Habeas Corpus Proceedings Started to Test Validity of Action

Validity of the 58 arrests made in Orange county liquor raids during the last two days will be tested Monday, according to legal steps taken today to release one of the prisoners on a writ of habeas corpus.

Attorney O. A. Jacobs, representing Lester Nelson, local meter reader for a light and power company, today filed application in the superior court for a writ, which was made returnable Monday at 11 a. m. before Judge F. C. Drumm. At that time the legality question will be threshed out, its result viewed as affecting the entire lot of prisoners. Jacobs attacked the validity of

Nelson's arrest and incarceration on the grounds that City Recorder W. F. Heathman, who signed the warrant, was outside of the city at the time, and on the further grounds that no complaint, affidavit or information of a public offense had been laid before the recorder on which to base the war-

#### Give Workers Praise In Chest Campaign

Directors, committee men and team workers, soliciting for the Santa Ana community chest fund, have done their work exceedingly well. Many of them have given their en tire time this week to further this worthy undertaking. Others have given more or less of their valuable time, and still others have worked late into the night.

With a limited number of workers in the field and with a limited office organization, kept down to a minimum to save overhead expense, it has been impossible to reach

every prospective contributor. The directors of the Santa Ana community chest are confident that there are many citizens, good Americans who believe in the American get-together spirit -who are willing and anxious to contribute to this fund, who have not as yet been solicited. These people may make their contributions by mailing their checks or money to Community Chest headquarters, First Christian church, Sixth street and North Broadway.

## SITE FOR UNIVERSITY

Registering its faith in the upbuilding of the northern end of Orange county by proving that every section should help another section, the Orange county harbor chamber of commerce, with three other port district commercial bodies participating, went on record last night at Costa Mesa as being the first community to endorse the project of bringing the southern branch of the state university to the county.

On motion of Lew H. Wallace, who declared that the coming of a university and the voting of bonds would prove a splendid investment insomuch as the cost of the project would be offset by the increased valuation of that section, the members voted unanimously to recommend to the board of supervisors that a bond election be called for buying a site for the university, if it should come to Orange county.

THE WISDOM OF A WARDROBE
The right time to put on a warm overcoat varies with climatic conditions in different sections. However, the right time to purchase your overcoat is right now. If you contemplated crossing the ocean, you would not defer acquiring your wardrobe until the day the steamer sailed. You would lay out your clothes in every detail in advance. You would make the rounds and make comparisons

God, that belief being inherent in the hearts of mankind. It is plain that the universe must have had a Designer, a Maker.

And for the morality of his children, they are given the ten commandments of divine origin. "They are old-fashioned," said the speaker, "but they will be doing business at the old stand long after the grass is growing on the grave of religious bigotry. It is a well-known fact that in every

Plan ahead. Buy according to the needs of your wardrobe, not according to the weather. Know the luxury of feeling that you are forearmed for every occasion and emergency, from a balmy, bracing day to one that sets you clapping palms to ears. Hasty, haphazard purchasing is the thief of satisfaction. The Well-bressed Man is not well-dressed by chance, but by virtue of the forehought he applies to the selections of his clothes and by virtue of anticipant his wants and the season, with a lurking ambition to see American men the best-dressed in the world. They can be, once they have grasped the economy of variety in clothes and the necessity of possing a correct and complete wardrobe.

The term heavy overcoat is a misnomer for, now-adays, even the warmest garment is astonishingly light due to the use of specially vown woolens and half linings. The spruce double-breasted garment, pictured in the accompanying sketch, is of the greatcoat type, with 4 buttons, patch or flap pockets; a back vent; a deep clipup colar and a fullfold drapery of skirt. This season, the vogue of the double-breasted effect is more marked than a year ago both in suits and overcoats. The length of overcoats ranges from about 44 to 48 inches and overcoats. WASHES IN 4 MINUTES

This wonderfully efficient washer keeps your clothes separated in the suds and prevents them from bunching and tangling together by means of a patented, smooth aluminum cone which occupies the center of the tub, and keeps the clothes spread out in a wide circle while they are being washed. This gives the soap and water a greater chance at the dirt, just as they have on a washboard. Let us demonstrate this Zenith to you in your home. It's seeing for yourself that counts.

### GRANT LICENSE FOR TOWER CAFE AT S. B

SEAL BEACH, Nov. 21.—The long drawn out controversy over granting John Edward Brink a licease to open a new cafe and cabaret in the Tower building was ended last night when the city trustees gave Brink permission to operate subject to approval and surveillance of the board and police committee. The new resort will be known as Cap's Inn.

will be known as Cap's Inn.
Captain Brink, the manager, was
the chief roadbuilder with Pershing
in Mexico, and was also prominently identified with the construction
of the national railroad which
spans the Isthmus of Tehuantepec.

The city has reached an agreement with the Pacific Electric company to co-operate with the railroad in building a school crossing at Eleventh and Electric streets, the cost of the work not to exceed \$100. The trustees have authorized repairs of the city hall, as leaks in the roof threaten the safety of the public library upstairs.

A movement to pave Fourth street has been initiated by Stephen Douglass and other property owners. The city's paving program to cover more than two miles of streets will reach the stage of active work on Ocean avenue in a few days.

As next Thursday is Thanksgiving aay, the trustees made it clear that there will be no meeting next

#### Boxers Hide Out Awaiting Trial

LOS ANGELES, Nov. 21.—The four principals in the alleged "frame-up" boxing bout of last Monday night in the Culver City arena were in hiding today, awaiting their preliminary hearing on a charge of violating the state antiprize fight law, scheduled for next Wednesday.

Fred Fulton and Tony Fuente, the fighters, together with their managers, Joe Reddy and Fred (Windy) Winsor, each at liberty on \$1.000 bail, will endeavor to disprove claims that Fulton was promised \$7,500 if he laid down to Fuente to boost the latter's "knockout" record.

The journal warns against the hasty passage of legislation to prevent the use of lead or other substances which make fumes dan-gerous to motorists. The death of several Standard Oil employes in New Jersey, he thinks, does not necessarily indicate carelessness.

"During the war extensive ex-periments were carried out to discover a dope for gasoline that would increase its effectiveness and power in motor-driven vehicles," says the journal. "By the accidental suggestion of a non-technical man connected with one of the large copper refining companies which produced, as a by-product, considerable quantities of tellurium, for which there was no known commercial use, it was discovered that tellurium could be used as a dope with marvelous results.

Demand Not Met.

"One of the largest motor com-anies of the country, after extenive tests, became convinced of the alue of tellurium for this purpose. However, the total production of about one per cent of what they estin ated would be the normal motor demand, so that tellurium was dropped and still remains a metallurgical monstrosity without any practical use.

Further experiments revealed the fact that tetra-ethyl lead was more efficacious than tellurium. the General Motors company, the Standard Oil company, and the Du Pont company have been making experiments, and a commercial process for the production of etra-ethyl lead has been worked out and a great quantity of gasoline has been sold with this ingredient as a dope and a very

Gas and wind in the stomach a companied by that full, bloated feel ing after eating are almost certain evidence of the presence of excessive hydrochloric acid in the stomach, cre ating so-called "acid indigestion."

Acid stomachs are dangerous be cause too much acid irritates the delcate lining of the stomach, often leading to gastritis accompanied by seri ous stomach ulcers. Food ferments and sours, creating the distressing gas internal organs, often affecting the

PARIS, Nov. 21.-Over three years after a sensational mur-der trial in Epinal, in the Vosges a judiciary commission has been appointed to investigate the cir-cumstances of the crime and the justice of the verdict. In the mean-time all three of the condemned have died, one in an asylum for the insane, one in a foreign French prison camp, and one from sham and despair. There is no parallel or this strange case in French

egal history. In March, 1891, three members of a family named Adam were tried for the murder of an old woman, he widow Barthelemy. Her death had occurred three years previously, and was completely enveloped in mystery. All that was known was that she had quarrelled with her husband at night and gone to the Adam home in a little peasant Kenneth Fisher, 14, of Oakland, Calif., wanted to set a fire. discovery has been made that will improve your looks and increase your charm-surely and with astonishing ease. This new treatment has been kept a secret for two years. During that time it has been tried on more than 4,000 women. Results have exceeded every expectation. Now this secret is to be shared

For You

This new preparation is called LaVenda. Its principal ingredient comes from high among the Rocky Mountains, the only deposit known of the kind. LaVenda must not be confused with the clay packs of the bast. It is a dainty film easily applied to the face and quickly removed without mess or bother. LaVenda is cream colored and of a velvety softness. It is composed of small particles full of energy It has five times the power of clays to restore pores to normal size and has three times the absorbing power.

A thin film of LaVenda on face and neck relaxes the pores and restores them to normal size. Impurities are absorbed and lines and wrinkles, sagging muscles, oily and dry skin, course texture, pimples, blackheads, and other blemishes disappear. When the film is removed the skin will be found velvety smooth, the cheeks rose colored and years have dropped away from the face.

La Venda contains no oil, no grease and no chemicals have been added for its effect.

Try LaVenda. It will work wonders for you as it has for thousands of others. A jar of this remarkable beauty film costs but one dollar at all druggists. If you are not delighted with the results obtained

after using one jar the manufacturer will return your money gladly

# Buyer or Seller

PERHAPS the importance of the Classified Advertisement has never been brought forcibly to your attention. The work of this page, although very subtle, is none the less effective. There is no market in the world that brings so many buyers and sellers into personal contact as the Want Ad page of a daily newspaper.

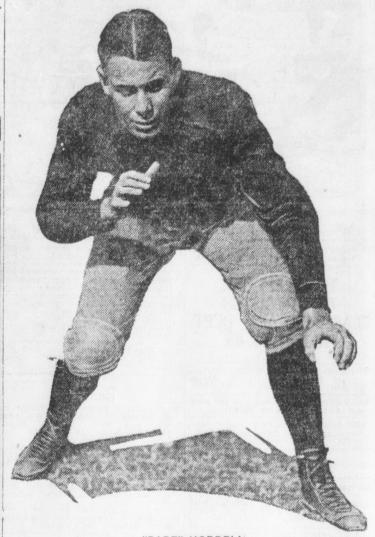

## False Economy

It is false economy to word your message so briefly that it fails to "put over" the sales message. This does not mean that your talk should be lengthy, but it does mean that you should use care and be doubly cautious that your want ad tells the story in such a way that it will be read carefully by the person who is interested in the article you wish to buy or sell.

"Bargain" doesn't mean much to the average person-constant use of the word has ruined its power. If you are selling real estate and state in your ad the fact that you have a "large" lot for sale, it is more than possible that your audience will pass it up. On the other hand, if you word your ad somewhat as follows: "Lot for sale, 200x300 feet; located in the southwest section of the city; \$150"-you immediately state a concrete fact and an interesting one to the man who desires to purchase a lot.

So far as the railroad shares were concerned their behavios was a repetition of other recent sessions. New Haven. St. Louis Southern, Rock Island, Wheeling & Lake Erie and other medium priced carrier stocks continued to move up vigorously on a volume of dealings altogether unprecedented for many of these issues.

A district slowing down in the trading pace was noticeable in the general list, when prices showed an easier tendency in the late afternoon. Despite the heavy profit taking in progress in various groups, operations for the rise went ahead in special stocks especially in the oils.

Marland was an outstanding feature in this class, reaching a newhigh on the move at 40%.

NEW YORK, Nov. 21.—An increase of approximately \$51,000,000 in rediscounts of the local federal reserve bank was the reflection of recent extraorilinary activity in the stock market and accounted for a slight falling of and accounted for a slight falling off in the institution's reserve ratio which stood at 78.6 against 77.2 a week ago. But despite the greater demand of Wall Street banks upon the central reservoir, the latter's total rediscounts were still not much more than half of last year's demonstrating that the board paid no heed to reports circulated this week in the speculative community that an increase in the rediscount rate might be promulgated. With the continued ease indicated in the money situation, stocks went ahead in vigorous fashion in the early dealings.

the Santa Ana junior college girl's basketball team met Fullerton yes terday afternoon there for the sec ond league game of the conference schedule. Staging a comeback in the last periods of the game after the Fullerton co-eds had gained a lead of 8 to 2, the Santa Ana team forged to the front.

As the game drew to a close the local girls were ahead by a single point. In the last minutes, Fullerton, on a free throw made the tally that decided the tie. On both sides the game was hotly contested with the ball zig-zagging from one end of the court to the other. When Fullerton found they could not penetrate the defense of Santa

Ana with Captain Addie Settle at center stopping the ball they began throwing the sphere over center from one end of the court to the other. To offset the move Miss Settle was transferred to guard. Miss Norma Forman, Miss Doro thy Cartwright and Miss May Wheeler, forwards, scored the points for Santa Ana. At center there were Miss Settle. Miss Frances Dungan, and Miss Earnestine Miss Martha McPeak and Miss Catherine Wood played the guard positions.

### CHIC - A - DE - DE SEED WHAT IS IT?

If you happen to be a lover a birds (and most of us are)you will be interested in being able to buy nice, clean bird seed. Our "BIG N" Bird Seed mixture contains 60% of the Imported Canary (more than any other mixture we have ever seen offered to the public). We have a cheaper grade, too-but the "BIG N" is what we stake our reputation on as we feel it simply cannot be improved upon.

We also carry Bird Manna, Bird Gravel or grits, Color foods, Nestling foods, Red Mite Special, Cuttle bone, etc.

We are especially careful in the selection of our bird feeds. We want your business.

While in the store look over our big selection of flower and vegetable seeds. Absolutely fresh stocks always. We have what you want. Also Bulbs.

Plant lawn seed and use lawn fertilizer now. We handle "Grozit" brand sheet manure at 50c a sack cheaper than Los Angeles. Try it.

LINCOLN' VOGUE

The Lincoln "craze," so called by those who can see no deeper than the surface of things, and which is sweeping not only America but all the English speaking countries and, strangely enough Russia also, turns out to be neither a craze, nor a vogue, nor a mania, but a very healthy sign of profound signifi-

We hear of Lincoln Hiwhway, cars, paint, candy, shoes, schools, art works, houses, ships, hats, coats, axes, knives, food products, paper furniture, plays and a thousand other things.

Since announcing their purpose to produce a great picture of the life and times of Abraham Lincoln, the Rockett Lincoln Film company of Hollywood were offered upwards of four score Lincoln stories or picture plays, and if all the people who have informed them of their intention to write books on the Lincoln theme make good, the market, wide open as it is to any good thing on the Lincoln subject, is in a fair way to be swamped.

In explanation of the unprecedented Lincoln impulse now at Bebe Daniels and Tom Moore in a scene from "Dangerous tracting such great attention, Mes srs. Al and Ray Rockett, originators of the Lincoln film idea, said: "The phenomenon is nothing less than the growth of Lincoln himself. He is with us, save for his caskeet of clay, as really as before April 15, 1865. Daily, hourly his stature grows. He has outgrown any one nation and people and now he belongs to the world, for he was the friend of the world.

PARIS, Nov. 21.-Again the gates of Paris are threatened and this time they are liable to fall. Not by a foreign foe, as they have been threatened in history, but by pro-gress and common-sense, are these celebrated portals being attackd. A campaign has been started to remove the "octroi," and if it is successful a picturesque and annoying heritage of the middle ages wil

disapear.

In the old days, when Paris was protected by a stone wall rather than an air fleet, the octrois were than an air fleet, the octrois were and nobody could pass in the gates and nobody could pass in or out without being examined. But sixteen inch guns and automobiles have rendered stone walls and octrois alike ridiculous. As a mat-ter of fact, the old swall has been almost completely torn down since the late war, and only a few strips of it have been left standing as souvenirs. Yet the octrois, with their iron gates and tired function-

aries, remain, and no vehicle can pass without being checked. What was the outskirts of Paris when the wall was built is now the residential district of the greater city. Beyond this circular bound-ary lies a great part of the city, and every day thousands of vehicles must pass these gates. The driver of every car must stop, meas ure his gasoline and report it to the guard. He received a slip of paper permitting him to pass, and must turn this in when he re-enters. This is due to the fact that tribute must be paid on goods entering the city. Gasoline is slightly cheaper outside than within, and that is why all motor vehicles are watched. Very rarely do the guards check up on the declarations of drivers, but the tedious formality must be performed.

Like Central Park

Octrois are situated in the Bois de Boulogne, and they mean exactly what a custom barrier would mean in Central Park. Nobody seems to be able to explain why they have been maintained, and the only explanation offered is that they have always been there. Each has its staff of officials, and the question is asked, what would become of all these functionaries if the posts were removed. The present government, however, has re-solved to remove all unnecessary officials, and it may get the octrois the near future.

One newspaper, campaigning for he abolition of the octrois, has made investigations and compiled some amusing figures. Last year 15,000,000 motor vehicles passed the city posts. It is estimated that each driver was forced to stop three minutes to measure his gas-oline and get the little slip of paper. This means 45,000,000 minutes lost, or 750,000 hours, or eighty-six years. Taxes collected on goods during this period, which might just as well be levied at the markets, amounted to about a mil-lion and a half dollars. Figuring an eight-hour day, the newspaper points out that 93,750 working days were required to police the octrois, and the pay of these men amounted to almost half of the revenue col-

lected. Hard On Motorists

These figures show how anti-quated is the octroi system, but gives no hint of the inconvenience to motorists. Whatever the weather, or however congested the roads, ese stupid formalities must be observed. The word "octroi" means city toll, and it true that prices of foodstuffs are very slightly lower outside the gates. A housewife might pass the boundary with five bananas, but if she has six she is subject to tax. The system of put-ting a levy on all provisions entering the city, though quite unknown in America, prevails all over France, and lively agitation is underway to substitute for it some practical arrangement, and to re lieve a long suffering public.

## MAN IS RESCUED

Before a crowd of several hunared interested spectators F. L. Wilcox, 32, of Wilmington, was rescued from drowning late today off the entrance to Alamitos Bay, Seal Beach, by J. P. Wilcox was attempting to negotiate the breakers off the bay opening in a small boat. The frail craft was capsized by an extra large comber and Wilcox was reaching the end of his strength when Alexander got to him.

In teaching this Science he taught the universal Fatherhood or causality of God and defined God to be Spirit, thus Mind; a teaching and definition which quite naturaland dennition which quite naturally mean that man, as the son of God, is the idea or reflection of Mind,—subject to God, Mind,—and that, in order to come to the estate of man—to rise to the stature of true menhand to the stature of true manhoodmen must be governed by God, Spirit, Mind, by pure intelligence; that men must seek "first the kingdom of God, and his righteous-ness,"—and cease from holding themselves subject to matter, nonintelligence in any form whatever. To those who accept the teachings of Jesus-to Christians-this in itself should be sufficient to estab-lish conclusively the fact that Christian Science, which teaches Mind, God, to be the only cause and man to be the reflection, the idea of Mind, subject only to Mind, is truly founded upon the teachings of the Christ,—especially so, since, like Jesus, it demon-strates this doctrine with all manner of beneficent "signs" following

that Motopower will not (1) to Prove . • remove carbon, (2) add power, (3) lubricates piston rings and valve stems, (4) increase compression, and (5) to prove that Motopower is injurious in any shape or form to any carburetors or motors made.

## Are Your Tonsils as Sensitive as Your Carburetor?

Motopower can, without any injury, be taken into the human system. To substantiate this, on several occasions, our demonstrators have gone to the extent of actually washing out their mouths with this fluid to prove for once and for all time that Motopower contains no harmful acids.

We will back the above facts with a THOUSAND DOLLARS that Motopower will accomplish all of the claims made above.

Concentrated Motopower is so darn pure that you can gargle a dose of it and make your tonsils feel like they had been washed in nectar. Of course we don't recommend that you take Motopower as a morning mouthwash to remove the onion taste accumulated from eating hamburgers on The Pike. What we want to get across to automobile owners is the fact that Motopower is simon pure. If you don't believe us, come around and make us prove that it takes the rheumatism out of the internal organs of your motor and makes it feel like a laughing hyena full of "Old Crow."

NOTICE: After you have used Motopower you should have increased performance, such as (1) More Power, (2) Quicker Starting, (3) Increased Mileage. If this is not the case, ask your service station to give you a free carburetor adjustment card.

## News From Orange County

BREA, Nov. 21 .- A double election to place before the people of Brea the problem of a \$60,000 sewer bond issue and to select a man to fill the vacancy on the city board of trustees caused by the resignation of Harry E. Becker will be held on the first Monday in Jan-

Complications also bid fair to arise in connection with possible condemnation proceedings against the Union Oil company land department with whispers of oposi tion from the Fullerton city officials because of the roximity of the proposed sewage disposal system to Fullerton's city water source. The matter may be brought before the state health department

Failure of the present city trus tees to agree upon a suitable candidate to fill the vacancy has caused considerable worry in official and business circles in the past where it was desired to avoid calling an election.

# Gapert testimony

Five of the best-known cooking authorities in the country conducted the testswith ten different kinds of foods.

Each dish was cooked twice, from exactly the same recipe, except that plain milk was used in one batch and Borden's Evaporated in the other. The two samples of each dish were served to groups of men and women who knew nothing about the purpose of the test. Each person was asked whether he could tell the difference, or which he preferred. Here are a few of the results:

> Soups: seven out of eight preferred the soup made with Borden's Evaporated. Creamed Carrots: five out of seven fav-

> ored Borden's. Creamed Potatoes: everybody voted for the Borden dish. Muffins and Creamed Chipped Beef: six

out of ten preferred Borden's; three of the others couldn't tell the difference. They proved beyond question that Borden's Evaporated Milk is exactly as good as plain milk for all cooking-while for

many dishes it is better. taste tells EVAPORATED

"Because we could see prosperity was in the air in Santa Ana, we lost no time in establishing a first-class drug store at Fourth and French streets," it was announced today by Paul V. McCoy and C. J. Mills of Huntington Beach. The new store will be known as the McCoy Drug com-pany and will be formally opened

The McCoy store is being equip-ped with one of the few frigid air fountains in Southern California. No ice is used in this fountain. A constant temperature is maintained which prevents ice cream from becoming too soft or too cold. There is an artistic brown and gray tile counter at the fountain.

"We expect to build our business by service and quality," McCoy de-clared, adding that only the highest grade of drugs would be sold.

McCoy came to California after being engaged in the drug business 20 years in Minot, N. Dak. He formed a partnership with Mills. and together they have been con ducting the McCoy Drug company in Huntington Beach. Mills will have charge of the beach store while McCoy will manage the Santa Ana store.

can be enforced and probably will be more and more his son." effectively enforced as time goes on. Its reasonably effective enforcement is largely but not only a question of man power-which means money power,-and that can be provided only by public sentiment.

The process of the adoption of the 18th amendment is conclusive proof that at the time of its adoption the preponderance of public sentiment was in favor of its provisions. Has public sentiment changed? Or is it that people will favor a law to the exing pressure to bear on Congress for such appropria- forded by conditions of interior counties?

Perhaps the majority of commercial bootleggers But there are plenty of good citizens who regard the 18th amendment as a joke. To them it is absurd, unthinkable, not to be taken seriously at all. And there are many other good citizens—generally better for co-operative operations? citizens than the class indicated in the last preceding sencence-who are bitterly and unalterably opposed to the 18th amendment. They regard it as a constitutional contradiction. They say it infringes on the lax that conditions became notorious and could not inalienable rights which the constitution is supposed

Opposing both these points of view is the fact that the 18th amendment IS A PART OF THE CONSTI-TUTION, adopted by a big majority of the people of this country—a country governed by majorities. It is not only the law of the land, but the highest form of law. It cannot be treated as a joke, or spurned on the ground of its alleged contradictory character, without bringing the whole constitution, our whole theory of the government by majorities, into contempt and disrepute.

The constitution is an agreement entered into by ALL the people of this country as to what may be done and what may not be done for the good of the WHOLE people. Constructively but unquestionably that agreement has been signed by every man and woman who loves our flag and claims its protection. We did not physically write our names down with those of Washington and Jefferson and Hamilton and Hancock, but in the sight of God and our own consciences our names are written there. The constituit is a sacred thing, not in any sentimental or even dustrial future upon her own good faith and her own religious sense, BUT BECAUSE IT IS WHAT IT IS. productive abilities.

We have here a tremendously complex problem in popular govrenment mixed with human psychology. She is not ready for that. complete enforcement to the breaking point-to the point where the people will see their mistake, if it be a mistake, and correct it. If the 18th amendment is socially and economically sound, and is, as many believe—as we believe,—one of the highest of forms of constitutional protection and promotion of the common good, then certainly the enforcement of its provisions are imperative. From either point of view half-way measures are fraught with grave dangerthe danger of a growing disrespect for law and order with a consequent undermining of the firm foundation upon which has been built the best government by, of and for the people the world had ever known And, to further paraphrase Lincoln, this country cannot exist half liberty within the law and half license without the law.

#### CORBETT'S HEALTH RULES

James J. Corbett at the age of eight was tubercular, at twenty-six he was the world's champion, and today at fifty-eight he enjoys rugged health.

Giving his rules and exercises for maintaining health in Hearst's International for December, he says "Half a century lies between that poor consumptive lad of eight and the 'boy' whom a group of prominent physicians examined the other day.

"'Fifty-eight, September first, eh?' one of them smiled up at me. 'If I did not know your record, I would call you-names. You haven't a gray hair in your head, your face is practically wrinkleless, you walk and talk like a man of forty and your body is sound as that of a man of twenty-five. What's the answer?

"The answer is easy!" I chuckled. "Here it is in six acts:

"Regular draughts of fresh air. "Regular exercises indoors and outdoors. "Regular sleeping hours—at least eight in every

twenty-four. "Regular care of your teeth so you'll be able to chew your food properly.

"Regular meals of nourishing food. "Regular attention to the intestines.

"'Ah!' one of them laughed. 'Then all any man needs to be a regular fellow is to be regular'." "And I left it at that."

#### THE JOY OF WORK

A chance meeting with Otis Skinner and the eager joy he had in his work inspired Ray Long, editor, to write the following in Hearst's International for December:

"I contend that that is one of life's greatest joys;

yet circumstances, ncessities make a lot of men do

"Many of them are pitch-forked into their jobs by parents. Some fathers seem to feel that it's a sort of blow to their ego if the boy doesn't want to carry on their work. That seems to me to be the acme of narrow-mindedness.

"After talking with Otis Skinner, I made one of the few decisions I have made about my son's future. If it is within my power he shall have the chance to Undoubtedly there are a good many sincere "con-scientious objectors" to the 18th amendment; but shan't try to make him be an editor or a publisher

#### Chinese Dawes Plan

San Diego Union. Now comes news of a "Dawes plan" for rehabilitating China. China has done for herself what it took the united efforts of the great powers to do for powerful Germany in the great war, and now China, like Germany, finds herself buried under an avalanche of obligations. If the present rumors are well founded, China would like to find a way out, and might readily accept even the stringent terms of a new Dawes plan. The new foreign minister, we read, would like to call an international conference of business men—diplomats barred—to arrange the

San Jose Mercury. No better proof that the United States and its peo-le is facing four years of prosperity can be found than that furnished by the stock markets and industries at the present time. Tabulation of election results had no been completed when the stock tickers began to reflect the returning confidence of the business and industrial world. Stocks and bonds arket places. Huge orders for steel and other building materials were placed. Architects, contrac-tors, builders received orders to go ahead with new structures. Sales organizations, advertising departments and factories received orders to prepare for a big year. No event could have meant more for the working classes or the business men of the nation than the sweeping election of Calvin Coolidge to the presidency.

#### That Body of Yours

By James W. Barton. M. D.

EATING FANCY FOODS The late Dr. Holt, formerly of Columbia University, was the outstanding physician in America in diseases of children. Physicians came from all parts of the world to learn his methods. And what are these methods? Simply the proper way to feed the young baby.

Thousands of children have been saved by his food methods. Of course, in the case of children, there is the natural tendency towards growth, and if suitable food is provided, the whole job is com-

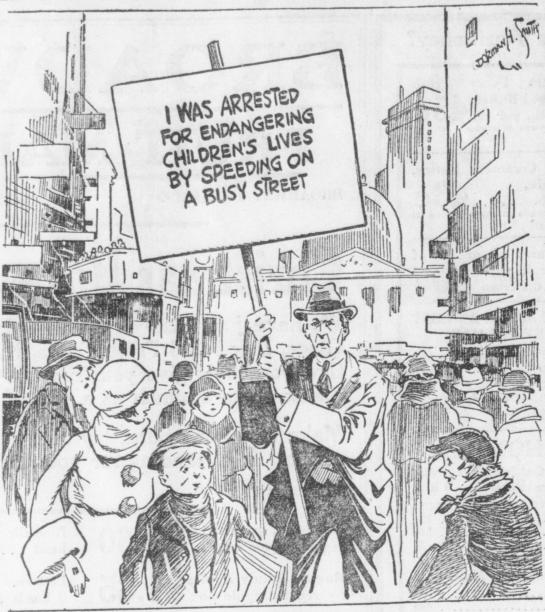

What about you? Well, you are an adult, and you have felt that you have your senses, your brain, and know how to feed yourself. Also the water you drink, the disposal of sewage and garbage, and other similar arrangements, are at such a point of efficiency, that you should really be a stronger man physically than any of the generations that preceded

But are you? You know you're not, and the examinaton of recruits during the war told the same story. What's the matter? I suppose you might call it the superiority of man's brain. Our friends the food producers are manufacturing foods that please the fancy. These foods are all right in themselves, if we ate an all-round diet. But unfortunately we like these specially prepared foods so much, that our old friends the garden vegetables are despised.

In other words, the reason you are not as strong a man physically as your great-grandfather is because whereas you eat what your fancy dictates. Now what's the lesson? Well, remember that just as the youngster grew strong from eating so must you get your strength of body from your food. There is no other way to get it.

There are the three kinds of food (1) meat and eggs, (2) fats, butter and milk, (3) vegetables and bread. A good ordinary rule is one part of meat, "I contend that that is one of life's greatest joys; to two parts of fats, to three parts vegetables. In love for your job. I enjoy mine. I enjoy it so much that it wrings my heart to think of any man wearing his life away in work that sandpapers his nerves. And
